Other: GitHub, LinkedIn

● About Me

Dream it. Believe it. Build it.

I am a junior web developer with over 3 years of experience.

I use JavaScript, TypeScript, and specifically the ReactJS library and NextJS framework to build progressive web applications which support responsive, localization and multi-theme (like dark mode). Practical searching and self-learning are my other abilities.

I'm on track with learning more about Front-End, Design, DevOps and new stuff.

● Skills and Abilities

Programming Language: JavaScript, TypeScript

Web Frameworks: Next.js, Tailwind CSS, Bootstrap

JavaScript Libraries: React.js

Front-End Stack: PWA, SASS/SCSS, Responsive design, SEO basics

Version Control System: GIT

Build & Dependency Management: NPM, Vite, Webpack, ESLint, etc

Node Modules: Redux

● Project Showcase

Night Trips: Coding a Beautiful figma to improve myself.
- TS, NextJS, Tailwind CSS, SASS (Demo) - (Figma)

Simple Blog: Semi Blog System but only in your browser with your LocalStorage.
- TS, ReactJS, Taiwind CSS (Demo)

DOT Game: An Engish-French website with game style and animations.
- TS, NextJS, Taiwind CSS, SASS (Demo) - (Figma)

● Languages

English: working proficiency

Farsi: native
